

# Emergency Services

Saguache County covers a land area of 3,146 square miles, with approximately 900 miles of county maintained roads.

Law enforcement is based on responses to complaints more than on patrols of the county. The distances that must be traveled may delay emergency responses including law enforcement, ambulance and fire. Snow removal priorities mean that roads from subdivisions to arterial roads may not be cleared for several days after a major snowstorm. Snow removal from school bus routes have first priority. Snow removal from roads within subdivisions are the lowest priority for public works and may be the responsibility of the homeowners.
